COMPOSITE INSULATOR

Polymeric Fuse Cutout Insulator:

Fuse cutout outdoor type is suitable for voltage from 15kV to 33kV, and it can protect distribution line and distribution transformer against overload and short-circuit damage, as well as disconnecting equipment. It has some features, such as:

Furnished with Arc-shortening rod (Extending rod) according to the voltage rating of fuse cut out, enlarging the breaking capacity; Advanced design of fuse tube and easy to install and uninstall the fuse link; Reliable and efficient current-carry path; All metal parts are treated by the special procedure to free erosion and rust...
